Recommend.: all locations
Quality: without tannin

Agronomic properties:

| | |
|--------------------|---|
| Youth development: | 4 |
| Flowering: | 5 |
| Maturity: | 5 |
| Plant height: | 3 |
| Lodging: | 4 |
| Broken stamps: | 7 |
| 1000 grain weight: | 5 |
| Botrytis: | 6 |
| Root diseases: | 3 |
| Rost: | 6 |
| Virus: | 5 |

Yield potential/Yield structure:

TKG: ~390 gr.

Crop management:

| | |
|-------------------|---|
| Sowing rate: | 40 grains/m ² |
| Sowing technique: | like cereals or row sowing 45cm |
| Sowing time: | beginning of March |
| Fertilization: | 0kg N / 65kg P ₂ O ₅ / 120kg K ₂ O |
| Harvest: | end of July |
