

GRACIA

Best yielding variety in Austria

- Very high yield potential
- Biggest grain of all varieties
- Very stable - no lodging or broken plant

Variety characteristics:

Type: fodder bean
Use: protein fodder
flower color: violet
Recommend.: also for difficult locations
Quality: with tannin

Agronomic properties:

Youth development:	4
Flowering:	4
Maturity:	6
Plant height:	6
Lodging:	3
Broken stamps:	3
1000 grain weight:	2
Botrytis:	5
Root diseases:	4
Rost:	4
Virus:	3

Yield potential/yield structure:

TKG: ~477 gr.

Crop management:

Sowing rate:	35 grains/m ²
Sowing technique:	like cereals or row sowing 45cm
Sowing time:	beginning of March
Fertilization:	0kg N / 65kg P ₂ O ₅ / 120kg K ₂ O
Harvest:	beginning of August
