

WINTER OILSEED RAPE

MARCELO

Most successful line variety

- Very good winter hardiness
- Early flowering and maturity
- Fast spring development

Variety characteristics:

Type: line variety
 Use: oil-production/linoleic
 Recommend.: for all locations
 Maturity: early

Agronomic properties:

Winter hardness: 2
 Spring development: 2
 Flowering: 4
 Maturity: 4
 Plant height: 6
 Lodging: 5
 1,000 grain weight: 6
 Phoma: 5
 Sclerotinia: 5
 Oil content: ~43.2%

Yield potential/yield structure:

TKG: ~5 gr.

Crop management:

Sowing rate: 70 grains/m²
 Sowing technique: drill sowing like cereals
 Sowing time: 20 August – 1 September
 Fertilization information: 2x100kg N / 80kg P₂O₅ / 200kg K₂O
 Harvest: end of June
