

WINTER OILSEED RAPE

NAIAD

Early and big harvest

- Fast development in autumn and spring
- Early flowering and maturity
- Compact growing type, easy harvest

Variety characteristics:

Type: hybrid
Use: oil-production/linoleic
Recommend.: for good soil
Maturity: early

Agronomic properties:

Winter hardness:	3
Spring development:	2
Flowering:	4
Maturity:	4
Plant height:	6
Lodging:	6
1,000 grain weight:	6
Phoma:	5
Sclerotinia:	4
Oil content:	~44.4%

Yield potential/yield structure:

TKG: ~5 gr.

Crop management:

Sowing rate:	50 grains/m ²
Sowing technique :	drill sowing like cereals
Sowing time:	20 August – 5 September
Fertilization information:	2x100kg N / 80kg P ₂ O ₅ / 200kg K ₂ O
Harvest:	end of June
