

# WINTER OILSEED RAPE

## ES Momento

The big hybrid for big yield

- slower development in autumn and spring
- medium-late flowering and maturity
- Big plats to manage also difficult and dry conditions

### Variety characteristics:

**Type:** hybrid  
**Use:** oil-production/linoleic  
**Recommendation:** also for difficult locations / early sowing

### Agronomic properties:

**Winter hardness:** 2 very good  
**Spring development:** 4 rather slow  
**Flowering:** 6 medium-late  
**Maturity:** 6 medium-late  
**Plant height:** 7 high  
**Lodging:** 4 good  
**Phoma:** 3 very good  
**Sclerotinia:** 3 very good

### Yield potential/yield structure:

**Yield:** 8 very high  
**Oil yield:** 7 very high  
**Oil content:** 7 high  
**1000 grain weight** 5 medium  
**Glucosinolat:** 4 good

### Crop management:

**Sowing rate:** 50 grains/m<sup>2</sup>  
**Sowing technique:** drill sowing like cereals  
**Sowing time:** 20 August – 5 September  
**Fertilization information:** 2x100kg N / 80kg P<sub>2</sub>O<sub>5</sub> / 200kg K<sub>2</sub>O  
**Harvest:** begin of July

### Variety description:

ES Momento is a very big and strong rape hybrid. The plants and the roots are growing very powerful, so ES Momento is able to manage also difficult conditions during the growing period.

Very suitable also for single plant sowing in rows 25 - 45cm.
